It emphasizes on strong credit selection, ongoing monitoring, and a mix of core and opportunistic trades to generate additional alpha over traditional fixed income products. Investors benefit from high liquidity, low duration (1-2 years), and quarterly cash flows of 2%. Managed by an experienced team, the fund aims to balance risk and return by focusing on credit quality, governance, and market opportunities in the alternative lending sector.	The strategy targets consistent medium- to long-term returns over government securities with a strong emphasis on capital preservation. It employs a blend of accrual, duration, and selective credit strategies, primarily investing in high-quality, predominantly AA-rated issuers across NBFCs, HFCs, corporates, and state-owned entities. Returns are supported by attractive spreads of ~350-400 bps over G-Secs and potential credit upgrades, backed by a robust risk management framework to ensure low volatility.
