<b>Shortlisting Parameters</b>	1) Invests in promoter driven companies that delivers higher growth, min holding 26%. 2) Companies with min Additional expected earning 3-5Y Growth of 3% over benchmark, Available at Relatively Attractive Valuation. 3) Has a long term track record of running PMS strategies.	1) The Fund blends listed equities across market-caps with up to 35% exposure to unlisted/pre-IPO opportunities; distinctive proprietary E-Qual Framework (quantitative scoring of management integrity 40%, capability 30%, wealth distribution 15%, investor communication 7.5%, liquidity 7.5%) ensures zero exposure to low-governance managements, red flags like high promoter pledging >70%, repeated debt restructuring or excessive related-party transactions, and filters via risk-reward matrix for quality-adjusted small/mid-cap premiums. 2) The listed portfolio mirrors the Golden Decade strategy, comprising 25-35 stocks diversified across large, mid, & small caps. Investments are guided by five structural growth themes, following a low-churn, buy-&hold approach aimed at generating long-term wealth.	1) The fund targets long-term capital appreciation from India's multi-decade growth drivers such as manufacturing, financialisation, digitalisation, green energy, defence, data centres, healthcare and semiconductors, where small- and mid-caps can offer outsized earnings growth and re-rating potential. 2) The sector-agnostic charter with the ability to invest 0-100% in listed equity and up to 35% of investable funds in unlisted/pre-IPO opportunities allows participation both in publicly listed compounders and in late-stage private businesses approaching listing or secondary liquidity. 3) The fund follows a "growth at reasonable price" philosophy, using a bottom-up process to identify scalable businesses with strong unit economics, high ROCE potential and ethical, competent management teams, rather than relying on top-down macro calls.	1) The fund follows a differentiated contrarian investment strategy focused on identifying fundamentally strong but temporarily out-of-favour sectors and companies. It aims to benefit from mean reversion opportunities by investing in undervalued businesses with a margin of safety and long-term growth potential. 2) The investment approach combines top-down sector allocation with bottom-up stock selection, focusing on management quality, business cycles, & valuation discipline. 3) The portfolio has a strong bias towards small and mid-cap companies across selected high-conviction sectors such as financials, manufacturing, infrastructure, logistics, and consumption. It maintains a focused portfolio of 25-30 stocks with exposure to only 4-7 value pockets at a time, enabling better participation in recovery cycles while avoiding overcrowded & expensive market segments.	1) One of the leading asset management company in India managing 23,463 Cr(as on May) in Long only strategy. 2) Fund replicates ICICI Contra PMS strategy, yielding 50%+ return in the past year. Benchmark-agnostic approach with no style constraints drives the funds performance.
